

Progressive Eye Plan fills the gap of vision coverage for your employees

In the current state of health insurance, employers face hard choices every day as to which plan to offer to employees at the best price. Sadly, many of the plans that are on the market either don't include vision coverage or add it at additional cost. Downing-McPeak Vision Centers is offering **Progressive Eye Plan (PEP)** for your employees. The plan may be used as the only vision coverage you offer or in addition to one your company may already have. The best part of the plan is there is **no cost to you or your employees** to be members of PEP. There are no contracts to sign and you may dismiss yourself from the plan at anytime.
